Subject: COVID-19 vaccine rollout begins in SA

A MESSAGE FROM THE PREMIER

COVID-19 update

Dear [REDACTED],

Today was a momentous day in the fight against COVID-19, with frontline workers receiving the first vaccinations in South Australia.

Our hard work in the lead-up to receiving the vaccine means that we have been able to **start vaccinating those at highest risk of exposure** the day after the first 4,000 doses landed in South Australia.

The rollout starts with Phase 1A, in line with the '[Vaccine Roadmap](#)', prioritising frontline healthcare workers, quarantine and border workers, airport staff, and aged care residents and staff.

WATCH: With frontline workers in rolling up their sleeves

The Marshall Liberal Government's world-leading COVID-19 response has **kept South Australians safe and our economy strong.**

And by working together, making sacrifices and following the expert health advice, as South Australians, we have made it through.

Now we are focused on **the next part our plan**, ensuring every South Australian who wants to get vaccinated, gets vaccinated.

For more information about the vaccine and the rollout, visit:
